

L'ASTEROIDE (177853) Lumezzane

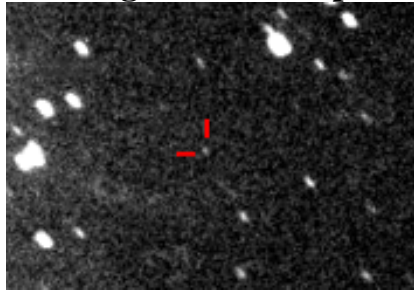

Scoperto il 5 Agosto 2005
presso l'Osservatorio "Serafino ZANI"

(177853) Lumezzane

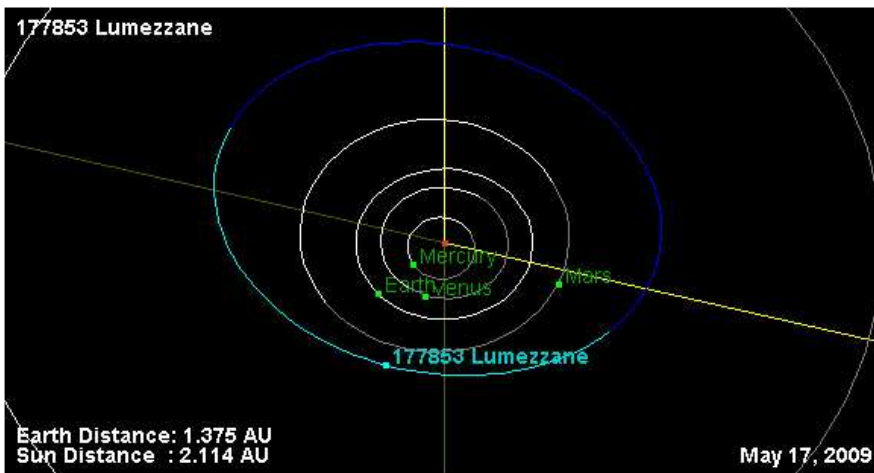

Discovered 2005 Aug. 5 by M. Micheli and G. P. Pizzetti at Lumezzane. A small town in northern Italy, near Brescia, Lumezzane is famous for its industrial production of steel cutlery. The astrometric station where this minor planet was discovered is located nearby and is part of the Serafino Zani Astronomical Observatory. It has been involved in observing minor planets since 1996.

Immagine della scoperta

Distanza il 05 Ago 2005
204 milioni di Km.
Diametro 3.3 Kilometri
Periodo di rivoluzione
4 anni e 2 mesi

Distanza alla data attuale
(17 Maggio 2009)
205,7 milioni km

Posizione attuale
dell'asteroide
(177853) Lumezzane

Percorso nel cielo
dell'asteroide (177853)
